## **CONEG Heavy Metals**

In response to your recent request, concerning our A, D, E, EW, H, K, M, N, P, W Series Pigment Foils (Manufactured after 1991), from the typical product data received from our raw material suppliers, the sum of the concentration levels of lead, mercury, cadmium and hexavalent chromium do not exceed 100 parts per million by weight.

Any trace quantities may exist as impurities in our raw materials. A substantial number of our raw material manufacturers and suppliers, as well as in prior succession, further upstream raw material manufacturers and suppliers, may not routinely test or screen for the presence of these. Additionally, any of our raw material manufacturers and suppliers may at a future time provide other information to alter this statement. None of these chemicals are deliberately added as a raw material component to our products. Custom Foils Company does not routinely test for the presence of these.
